

For Better Yield, Best Strat Up

Xurian® is a bacterial inoculant based on the rhizobacteria *Pseudomonas putida* strain i-4613.

Pseudomonas putida is a PGPR (Plant Growth Promoting Rhizobacteria) which promotes plant growth by actions in the soil.

The bacterial inoculant increases yield, size and quality of fruits and vegetables.

Features & Benefits of Xurian®

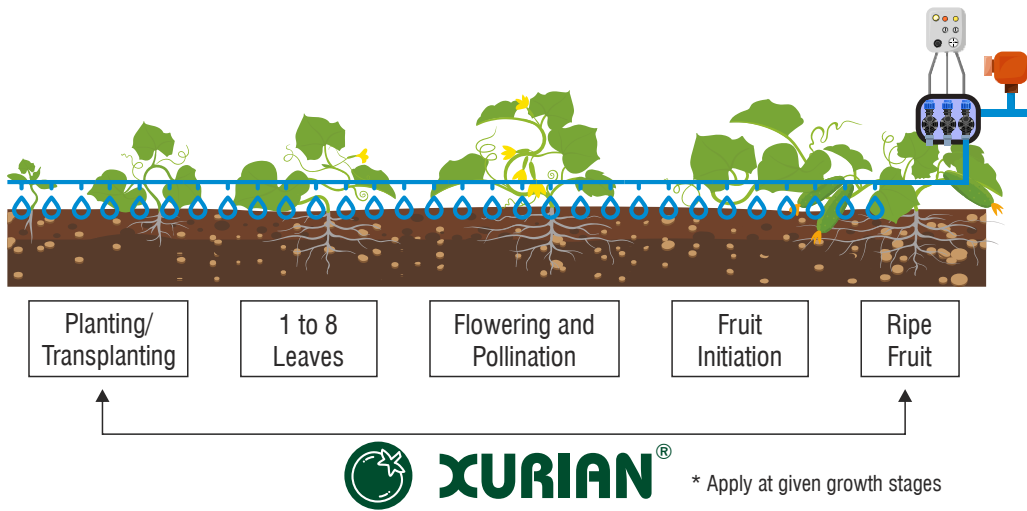

- Root and vegetative growth promoter.
- It produces plant hormones production (IAA, gibberellins, cytokinins).
- Increase Carboxylic Acids Deaminase Production (ACC Deaminase).
- Improve the plant nutrition (P, Fe) intake.
- Improve the soil structure (Better water, retention and setting).
- Increase Humification enzymes production.
- Stay green effect.
- Improve the yield.
- Increase Phosphorus solubilisation.
- Improve the abiotic stress tolerance.
- Increase Siderophores production.

 ProChemica®

XURIAN®

| Crops | Rate of Use |
|--|-------------|
| Almond, Apple, Apricot, Artichoke, Banana, Barley, Beans, Cabbage, Canola, Carrot, Celery, Cherry, Chestnut, Chickpea, Corn, Cotton, Cucumber, Eggplant, Garlic, Grape, Grapefruit, Hazelnut, Kiwi, Leek, Lemon, Lentil, Lettuce, Melon, Nectarine, Nuts, Oat, Olive, Onion, Orange, Parsley, Peach, Peanut, Pear, Peas, Pepper, Pistachio, Plum, Pomegranate, Potato, Pumpkin, Quince, Rice, Rye, Soybean, Spinach, Strawberry, Sugar Beet, Sunflower, Tangerine, Tobacco, Tomato, Vineyard, Walnut, Watermelon, Wheat. | 1 Lt/Ha |
